KIESEWETTER'S ORCHID GARDENS

1950 Catalogue

RALPH R. KIESEWETTER'S

and **JOSEPH W. URMSTON'S** many years of experience as Orchid Hybridists go into the making of every seedling produced at Orchid Gardens and through these years they have expended every effort to guard and maintain their policy of **QUALITY PRODUCTION**.

The very best stud plants available are used in each of these crosses and every one is guaranteed to be as represented.

Wasted years of culture and anticipation, which end only in disappointment, can be avoided by the initial selection of reliable seedlings, which have been developed in the hands of experienced Hybridists.

You can select a Kieseewetter-Urmston seedling with confidence. **EXPERIENCE** and **FIDELITY OF PURPOSE** are **YOUR PROTECTION**.

outstanding hybrids

We hear talk about experimentation and the care exercised by Orchid Hybridists in making their crosses to develop increasingly better hybrids. "Once in a lifetime" after years of patient waiting—and wondering—their efforts are rewarded with the magnificent perfection of flowers like **Lc. Cuesta var. Sangué di Dio, C. Joyce Hannington, C. amabilis, C. Peetersii, Lc. Joe Hampton, Lc. Trail's End.** This result is proof of the high standard of quality possible when the hybridists use the right combination of parents.

The above-mentioned **controllable hybrids** have proven to be some of the **finest crosses of all time.** They are outstanding in shape, texture, and lasting qualities. And further, one of the best things about these crosses is the fact that they come so extremely uniform. Wherever shown they prove their superiority. They have taken more awards in the past two years than any other comparable group. Three different plants among our **C. Joyce Hannington's** alone have received a **Gold Medal, First Class Certificate,** and an **Award of Merit,** respectively. The exhibit of our **controllable hybrids** at the International Flower Show in the spring of 1949 was awarded a **Gold Medal** by the **American Orchid Society** as well as a **Gold Medal** by the **Horticultural Society of New York.**

Since **C. Joyce Hannington** has proven to be such a fine cross we have made it again at Orchid Gardens and seedlings of straight Joyce Hannington which have been in such demand will again be available in tubes late this fall. In the meantime, numerous crosses have been made using one or another of these excellent examples of this cross as one of the parents.

ORCHID SEEDLINGS IN TUBES

CROSS NUMBER	CROSS	FLOWERING SEASON	PRICE
130	Lc. Areca, var. Model, F. C. C. X Blc. Princess Shimadzu Dark purple	Winter	\$25.00
131	Lc. Andromeda X Blc. Natalie Koussevitsky Yellow, red-lip	Fall-Winter	\$35.00
132	Lc. Triumphant X C. Robert H. Jewell Yellow, red-lip	Fall-Winter	\$25.00
134	C. Robert H. Jewell X C. Mrs. Edward Roehrs Yellow, red-lip	Fall-Winter	\$25.00
137	Lc. Hilary, F. C. C. X Lc. Dorothy Tucker Dark purple	Winter	\$35.00
127	Phal. Tetraploid (Cast Iron Monarch) X Phal. Summer Cloud		\$20.00
138	Phal. Doris X Phal. Tetraploid (Cast Iron Monarch) Both of these crosses are large, pure-white flowering phalaenopsis		\$20.00
136	Vanda Sanderiana Two of the very finest Sanderianas have been used for this cross.		\$20.00
114	Cym. Alexanderii, var. Westonbirt X Cym. Jungfrau		\$20.00
129	Cym. Alexanderii, var. Westonbirt X Cym. Ivory Wings		\$20.00
107	Cym. Alexanderii, var. Westonbirt X Cym. Diana, var. Lou Henry Hoover		\$20.00

46	Lc. Windermere, F. C. C. X Lc. Locarno Dark Purple	Winter

URMSTON PROVEN CONTROLLABLE CATTLEYA HYBRIDS

Seedlings of These Crosses Available in Tubes Only

These are immensely vigorous, free-flowering crosses, producing large dark flowers. The parents were carefully selected from a house of three thousand plants in bloom. The stud plants chosen were all developed from our fine *C. labiata*, and the resulting seedlings therefore contain one-half *C. labiata* blood. Their flowering period, in all cases, can be controlled to within three weeks, thus affording ideal stock for Christmas, Easter, Mother's Day, etc. production. The large, dark flowers provide welcome relief from the weaker-colored *Trianae* and *Mossiae* hybrids ordinarily available during winter and spring.

These crosses were originated from a strain of fine, strong-growing *Cattleyas* that are perfectly adapted to optimum cut-flower production. Our *C. amabilis*, for example, has produced up to seven flowers to the spike, with as many as twenty flowers to a six-inch pot. Perhaps the most remarkable and telling feature of these flowers is their dissimilarity to other flowers available during winter and spring. The predominance of *labiata*, *gigas* and *aurea* blood accounts for their all-around better quality, and increased saleability.

CROSS NUMBER	PARENTAGE	PRICE
4 J.U.	<i>C. amabilis</i> , very fine variety X <i>C. Peetersii</i> , very fine dark variety	\$50.00
37 J.U.	<i>C. Labi-Royal</i> X <i>C. Peetersii</i> Both parents were fine dark, large flowered varieties. The results should be outstanding.	\$50.00
41 J.U.	<i>C. Portia</i> . This is a remake of an old hybrid, using exceptional home-raised parents. Should prove most useful in meeting the demand for medium-size dark flowers at Christmas and in the spring.	\$50.00
42 J.U.	<i>C. amabilis</i> , fine variety X <i>C. labiata</i> , very dark variety The <i>labiata</i> used here was the result of two generations of home-raised <i>labiatas</i> . This strain will undoubtedly provide us with the breeding stock for tomorrow. This cross should stand in a class by itself.	\$50.00

The following crosses flower naturally from late summer to late fall. Now their blooming period may be reversed to give spring flowers. After flowering in spring, they will usually grow again and produce an early winter crop. They represent a distinct asset to fill in the empty spaces left between the labiata hybrids. These were bred from the finest exhibition type parents. They are strong-growing, heavy-textured, dark flowers and should be extremely free-flowering.

CROSS NUMBER	PARENTAGE	PRICE
1 J.U.	(Lc. Marie Dobrott X Lc. Hilary, F.C.C.) X C. Peetersii, Fine dark variety A very fine cross combining two of the best things in our nursery. The best feature of both parents is the ability to produce an exceptionally high percentage of bold, large-flowering seedlings.	\$35.00
10 J.U.	Blc. Chief Joseph X C. amabilis Both parents were very fine. This should be a free-flowering variety of good color with a very fine lip. Growth is vigorous.	\$35.00
26 J.U.	Lc. Mme. Brasseur Hye X (Lc. Marie Dobrott X Lc. Hilary, F.C.C.) This is a very strong grower. Both parents were highly colored. A fairly large percentage should have splashed petals.	\$35.00
28 J.U.	(Lc. Hilary, F.C.C. X Lc. Morvyth, var. Magnifica) X (Lc. Cavalese X C. Tityus, var. The Pearl) This should produce some wonderful results. Well worth growing for the extremely high quality of the flowers, although not quite so vigorous as some of the others.	\$35.00
30 J.U.	Blc. Chief Joseph X (Lc. Cavalese X C. Tityus, var. The Pearl) Some beautiful color combinations are expected from this cross.	\$35.00
31 J.U.	(Lc. Marie Dobrott X Lc. Hilary, F.C.C.) X (Lc. Crowborough X Lc. Hilary, F.C.C.) This will undoubtedly be a very fine hybrid. Two of the best of two very fine batches of seedlings were selected as parents.	\$35.00

The following are yellow crosses. Their flowering period, summer and fall, can be reversed as with the previous group, providing spring flowers when yellows are normally practically non-existent. These crosses were all bred from fine varieties of **Blc. Chief Joseph**, which is unique among yellows. Of the many hundreds that we have flowered we have never had a deformed bloom. The color ranges from chartreuse through yellow and bronze. The flowers are large and the plants are considerably more vigorous than most yellows.

CROSS NUMBER	PARENTAGE	PRICE
11 J.U.	<p>Blc. Chief Joseph X (C. Venus X Bc. Corrientes)</p> <p>Some very large flowers can be expected here, yellow through bronze.</p>	\$35.00
16 J.U.	<p>Blc. Chief Joseph X (Lc. Crowborough X Lc. Hilary, F.C.C.)</p> <p>This cross should produce many varieties with bronze to apricot sepals and petals. As might be expected from the breeding, Lc. Crowborough X Lc. Hilary gives us many flowers of this class which should be intensified by the Blc. Chief Joseph.</p>	\$35.00
18 J.U.	<p>Blc. Chief Joseph X Lc. Plymouth</p> <p>This is a very strong growing yellow, producing freely.</p>	\$35.00
19 J.U.	<p>Blc. Chief Joseph X Bc. Durga</p> <p>We expect a fine large Brasso with sepals from cream to bronze, and a large beautiful lip with plenty of gold.</p>	\$35.00
20 J.U.	<p>Blc. Chief Joseph X C. aurea</p> <p>The C. aurea used here was the finest of a home-raised group. This should produce a well-balanced lot of strong-growing yellows.</p>	\$35.00
22 J.U.	<p>Blc. Chief Joseph X (Lc. Carmencita X C. Fabia)</p> <p>This will be a variable cross yielding mostly good yellows and bronzes, along with some dark flowers.</p>	\$35.00
24 J.U.	<p>Blc. Chief Joseph X Lc. Canhamiana (alba)</p> <p>This is one of the most vigorous seedlings in our nursery, being equal to or better than Lc. Canhamiana. Colors should be from cream through bronze.</p>	\$35.00

GENERAL INFORMATION

and SPECIAL INSTRUCTIONS

SEEDLINGS IN TUBES

The agar formula in which orchid seeds are planted is a jelly-like material which will break up easily when disturbed, therefore, it must be realized that seedlings in tubes will undoubtedly arrive at their destination stirred up. Orders of ten tubes or more can be packed in a specially prepared box and shipped via Railway Express with a reasonable degree of success but regardless of careful packing or method of shipment we cannot guarantee the condition of tubes on arrival. However, this disturbance of the agar does not in any way affect the seedlings and losses will not be suffered if the seedlings are transplanted **IMMEDIATELY UPON ARRIVAL**. Because of this fact seedlings in tubes are never offered for sale until they are ready for transplanting into community pots.

To avoid excessive losses, prepare your community pots in advance and plan to take care of your seedlings as soon as they arrive.

Remove the contents of the tube to a piece of glass and sprinkle a few drops of water on the seedlings to separate them from the agar. As you separate them, sort the seedlings into groups according to size since they will do better if planted this way. Then using your favorite planting medium, put them into the community pots. Even the very smallest seedlings can be salvaged if they are tossed evenly upon the surface of a five or six inch bulb pan, using the same potting material that you use in the community pots. Leave a half inch space at the top of the pot so that a piece of glass can be placed over the top of the seedlings to maintain the highest possible humidity. Then place the pot in a saucer of water so that the seedlings will be kept very moist. Check them in about a week and you will find that many of them have grown roots and can be planted into their community pot. Replace your glass and leave them for another week and continue in the same way until all of the small seedlings have been planted. By this procedure you will reduce your losses to a minimum; it is an unnecessary loss to throw away the small seedlings as many people do. There will usually be some small seedlings in every tube since some seeds are so much slower to germinate than others.

CUSTOMERS WHO WISH TO GROW THEIR SEEDLINGS ON FOR AWHILE IN THE TUBES SHOULD PLAN TO PICK THEM UP HERE AT THE GREENHOUSE.

ORDERING

Orders may be placed early to reserve your selections but shipments will be made only when weather conditions permit so that safe delivery to your door can be assured. Orchid plants must be guarded against chilling since they may not recover from the set-back suffered thereby.

If you have a choice, please specify the approximate time that you would like to receive your order, otherwise, we will notify you a few days in advance of shipment so that you can be ready to receive your order. The safe shipping period opens about May fifteenth and continues through October. Plants can be safely shipped by Air Express within the Continental United States any time during the season when there is a mild day to safely transport the package from the greenhouse to the airport, since arrangements have been made with the Airlines to carry these perishable parcels inside the plane at room temperature. If shipment is made to a cold area, plans should be made to pick up the parcel upon arrival so that it does not have to travel around in an unheated delivery truck. Shipment during the coldest part of the winter is discouraged.

When you place your order please mention a second choice if you have one, otherwise we will notify you that we cannot fill your order. NO SUBSTITUTIONS WILL BE MADE WITHOUT SPECIFIC INSTRUCTIONS FROM YOU.

PRINT OR TYPE YOUR NAME AND ADDRESS CLEARLY.

INCLUDE DEFINITE SHIPPING INSTRUCTIONS WITH ALL ORDERS: Please specify whether you wish your package sent by Air Mail; Air Parcel Post; regular mail; Air Express; Air Freight; or Railway Express.

Prompt delivery of your plants is important.

SHIPMENTS

Selection of the finest and largest plants available in each lot of the crosses included in your order will be made; however, please remember that all crosses do not attain the same size at the same time, therefore do not expect to receive all seedlings of equal size when ordering various crosses. They may or may not be the same and the explanation is simple: all of the tubes are not started at the same time therefore the period of growth varies in each case placing different crosses at an individual stage of development. Furthermore, different parent plants evidence different growing habits which are often reflected in the seedlings produced by these plants. The amount of sun during any one season plays an important part in the growth of plants also so that the seedlings from one cross may even vary somewhat from one year to another. Be assured that you will receive the best from the lot that you have ordered.

ALL SHIPMENTS ARE MADE F. O. B. ROSLYN, L. I., NEW YORK and there is no additional charge made for packing.

SHIPPING CHARGES

All freight and express packages marked for delivery within the boundaries of Continental United States will be sent COLLECT.

Prepayment of postage is required on all packages carried by mail regardless of destination.

Prepayment of charges is also required on all packages sent outside the boundaries of Continental United States.

To facilitate handling, Orchid Gardens will advance the necessary charges when prepayment is required and a statement will be forwarded to you following shipment. Prompt reimbursement of these charges will be appreciated.

INSURANCE

All packages will be insured to the full value of their contents except when they are to travel by mail. The U. S. Post Office will not accept parcels containing plants for insurance. Our careful attention will be given to adequate insulation, secure wrapping and labeling but further responsibility after the parcel leaves our hands must be assumed by the customer.

PAYMENT

All orders are payable in U. S. Dollars; check, cash, or money order should accompany your order, unless previous arrangements have been made to open a credit account. When cash is used for payment please send registered mail for safe delivery.

ALL ITEMS LISTED ARE SUBJECT TO PRIOR SALE.
